### ***PERSONAL STATEMENT***

My primary research focuses on the experimental nuclear physics such as the investigation of radiation effects and defects and positron annihilation lifetime spectroscopy in solids under different types of radiation conditions. I am particularly interested in understanding behaviors of the substances that are prominent materials

for radiation shielding against gamma, neutron, electron and ion irradiations. As an associate professor at Flerov Laboratory of Nuclear Reactions at the Joint Institute for Nuclear Research, I have gained precious experience in the nuclear topics such as shielding materials for nuclear applications, irradiation damage and analysis and studies of ion—radiation stability of microstructure, elemental and phase compositions. The scientific field of my researches connected with structure and phase state investigation of promising nanocomposite materials for nuclear applications. Pure boron compounds and boron-tungsten based composite materials were used in the experimental process that had been irradiated by alfa, neutrons, ions, and electron and flows of high-energy charged particles. My research area mainly focuses boron and tungsten alloys that are prominent materials due to their high melting point, low vapour pressure, very low sputtering erosion yields and high thermal conductivity for armour materials of plasma facing components. On the other hand, its limitations are associated with handling at low temperatures, plasma compatibility including neutron irradiation and radiological issues.

---

## ***EDUCATION***

### **09/2023 Doctor of science**

**Thesis Title:** THE EFFECTS OF HEAVY ION, NEUTRON AND IONIZING IRRADIATION ON THE STRUCTURAL CHANGES AND THERMOPHYSICAL PROPERTIES OF BORON BASED COMPOUNDS

**09/2019**

**Supreme Attestation Commission under the President of the Republic of Azerbaijan | Baku, Azerbaijan**

By the decision dated October 7, 2019 (Protocol 19-K) confers on Matlab N. Mirzayev the academic title of

**Associate Professor in the Specialty of Radiation Materials Science**

**01/2010 – 01/2014**

**Institute of Radiation Problems, Azerbaijan National Academy of Sciences| Baku, AZ1143 Azerbaijan**

**Ph.D:** Radiation material science, application and technology

**Thesis Title:** INFLUENCE OF INTERNAL AND EXTERNAL IRRADIATION ON ELECTROPHYSICAL PROPERTIES OF URANYL-SILICATE COMPOUNDS

**Degree:** Ph.D on Physics, Senior Scientist

**09/2005 – 07/2007**

**Baku State University, Faculty of Physics | Baku, AZ1143 Azerbaijan**

**MSc:** Division of Physics Education, Master Program, Faculty Physics of Solid State

**09/2001 – 07/2005**

**Baku State University, Faculty of Physics | Baku, AZ1143 Azerbaijan**

**BSc:** Division of Physics Education, Bachelor Program, Faculty Physics of Solid State

---

## ***EMPLOYMENT HISTORY***

**01/09/2017 – Present**

**Associate Professor | Flerov Laboratory of Nuclear Reactions at the Joint Institute for Nuclear Research.**

**Scientific and Experimental Physical Department:** Ion-implantation nanotechnology and radiation materials science

**Head of Department:** Vladimir Alexeevich SKURATOV, D.Sc.

**Dubna, Russia**

**01/09/2017 – 18/12/2014**

**Senior Scientist | National Nuclear Research Center, AZ1073, Inshaatchilar pr. 4, Baku, Azerbaijan**

**Division:** Department of Nanotechnology and Radiation Material Science

**Position:** Ph.D on Physics, Senior Scientist

In this period, I carried out studies on the following topics:

Determination of microstructure, elemental and phase states of the boron matrix composite under the radiation irradiation conditions. As shown in the below techniques:

- Scanning Electron Microscopy (SEM)
- X-Ray Diffraction (XRD)
- Raman Spectroscopy
- Small-Angle Neutron Scattering (SANS)
- Differential Scanning Calorimetry (DSC)
- Thermogravimetric analysis (TGA)

**06/05/2007 – 23/12/2014**

**Research Fellow | Institute of Radiation Problems, Azerbaijan National Academy of Sciences| Baku, AZ1143 Azerbaijan**

**Title of department:** Physics of radionuclide-containing materials.

**Position:** Researcher

I studied the topics as shown below during this period:

- Acquaintance with gamma irradiation technique and irradiation of composites by high-energy electrons.
- Electrophysical properties of boron composites irradiated by gamma and ions.
- Analysis and studies of ion—radiation stability of microstructure, elemental and phase compositions.
- Investigation of surface modifications and phase transformation of composite materials under the high gamma irradiation conditions.

---

#### **ADDITIONAL SKILLS / RESEARCH INTEREST**

I have been working as a research assistant at the Flerov Laboratory of Nuclear Reactions at the Joint Institute for Nuclear Research since 2017. In the meantime, I also have some responsibilities to give lectures at the following laboratories.

- Radiation measurement techniques
- Positron annihilation lifetime spectroscopy XRF Analyses
- XRD Analyses
- SEM Analyses
- Energy-dispersive X-ray spectroscopy (EDS, EDX)
- The investigation on behaviour of soil samples against radiation
- Selection of tracer injection and sampling procedures
- Raman Spectroscopy
- Small Angle Neutron Scattering (SANS)
- Differential Scanning Calorimetry (DSC) Thermal Analysis.
- Thermogravimetric Analysis (TGA)

---

## ***OTHER SKILLS***

---

- **IT: Good command of Microsoft office**

- Word, Excel, Power Point.
- Origin Pro
- Match 3
- Raman Tools

- **Languages:**

Azerbaijan (Fluent)

Turkish (Fluent)

English (Fluent)

Russian (Fluent)

---

**Journal referee:**

Journal Surface Engineering and Applied Electrochemistry

Vacuum

Modern Physics Letters B

International Journal of Modern Physics B

Pedosphere

Radiation Physics and Chemistry

Ceramics

Materials today communications

- Editor in Advanced Physical Research Journal.

The Journal ***Advanced Physical Research*** invites contributions of three types:

1. Original articles
2. State-of-the-art reviews
3. Short communications

The scope of the Journal includes the following topics and related areas:

Theoretical and Applied Physics

Condensed Matter Physics

Statistical Physics

Atomic and Molecular Physics

Optical Physics

Quantum Electronics

Radiation Materials

Nanomaterials

Physics Education
