Course outline	This course examines problems encountered in designing, operating, and controlling service operations. Topics will be discussed include: Managing customer expectations and perceptions, managing supply networks and supply relationships, designing the customer experience and the service process, measuring, controlling and managing, creating and implementing strategy.		
Course objectives	Among the objectives of the Course are: To provide students with the core concepts, methods and techniques of service operations management Introduction to operations management through global environment and Operations strategy, managing projects and forecasting demand To learn methods and tools to design operations Acquire some practical skills and managerial way of thinking to manage operations		

	Gain three hours of credit towards graduation.
Learning outcomes	<p>Upon successful completion of this course, students will be able to:</p> <p>Understand the two perspectives on the nature of service who allow to better address customer needs.</p> <p>Explain key strategic and tactical challenges service operations managers face</p> <p>Understand and be able to apply the methods to assess the needs, and to manage customer expectations and perceptions.</p> <p>Recognize types of customers and describe how service operations managers can develop good relations with customers.</p> <p>Understand supply chains and networks and explain how can develop global network strategy.</p> <p>Explain how managers can develop customer journey and illustrate role of technology in developing customer experience.</p> <p>Understand how organisations can improve service quality and deal with challenges such as customer complaints and service failures.</p> <p>Identify types of service process and demonstrate how service process can be repositioned.</p>
Policy	<p>Attendance and participation: The students are required to attend all classes as part of their studies and those having legitimate reasons for absence (illness, family bereavement etc.) are required to inform the instructor. If a student is late to the class for more than five (5) minutes, she/he is written absent. Nevertheless, the student can participate in the class. The attendance and participation will account for 10 % of the total course grade, which depends on students' good class attendance and active participation in class discussions.</p> <p>Preparation for class The structure of this course makes your individual study and preparation outside the class extremely important. The lecture material will focus on the major points introduced in the text. Reading the assigned chapters and having some familiarity with them before class will greatly assist your understanding of the lecture. After the lecture, you should study your notes and work relevant problems from the end of the chapter and sample exam questions. Throughout the semester we will also have a large number of review sessions. These review sessions will take place during the regularly scheduled class periods.</p> <p>Withdrawal (pass/fail) This course strictly follows grading policy of the School of Economics and Management. Thus, a student is normally expected to achieve a mark of at least 60% to pass. In case of failure, he/she will be referred or required to repeat the course the following term or year. For referral, the student will be required to take examination scheduled by instructor.</p> <p>Assignments/quizzes There will be four quizzes and these quizzes will constitute 20 percent of the total grade. Makeup quizzes will not be given except in the case of dire emergency. Students are required to turn in answers to assignments at the beginning of the classes at which they are due. Late assignments will not be accepted. All quizzes will consist of both open-ended and multiple-choice questions. 80% of questions in all quizzes will be open ended, 20% will be multiple-choice questions.</p> <p>Cheating/plagiarism Cheating or other plagiarism during the Quizzes, Mid-term and Final Examination will lead to</p>

	<p>paper cancellation. In this case, the student will automatically get zero (0), without any considerations.</p> <p>Professional behavior guidelines</p> <p>The students shall behave in the way to create favorable academic and professional environment during the class hours. Unauthorized discussions and unethical behavior are strictly prohibited.</p>
