	ACCA Financial Reporting (FR) S23 Notes (OpenTuition),			
	Financial Accounting and Reporting, 19th Edition by B. Elliott, J. Elliott, 2019, Pearson			
Course Outline	_	ned to provide students with a comprehensi		
	including the preparation and presentation of financial statements, understanding accounting standards,			
	and interpreting financial reports. It will focus on International Financial Reporting Standards (IFRS). The			
	course is intended to interpret and analyze financial reports, understand the impact of various accounting			
	standards on financial performance, and gain insight into the global harmonization of financial reporting			
	practices.			
Course Objectives	The course aims to equip students with the skills to construct and analyze financial accounts, considering			
Course Objectives	the impact of various accounting issues on reported figures. These issues include the reporting of tangible			
	and intangible assets, continued and discontinued operations, historical cost versus fair value accounting,			
	and business combinations. The course also develops the ability to prepare financial reports for both			
	individual entities and groups in compliance with International Accounting Standards. Additionally, it			
		g the financial performance of these entitie		
	emphasizing the regulatory framework established by the International Accounting Standards Board			
	(IASB).			
Learning Outcomes	Upon completion of the course, students are able to			
	appreciate the role of conceptual and regulatory framework in the development and			
	harmonization of accounting standards;			
	 treat the effects of events in accordance with International financial reporting standards (IFRSs); prepare 			
	• disclose financial reports both for single company and group of companies in line with IFRSs;			
		ancial statements.	V
