

Identification	Subject	CIV382 Reinforced Concrete Fundamentals-2 6 ECTS	
	Department	Civil Engineering	
	Program	Undergraduate	
	Term	Spring, 2022	
	Instructor	Dr. Ziaaddin Zamanzadeh	
	E-mail:	zzamanzadeh@khazar.org	
	Phone (WhatsApp):	+989144167502	
	Classroom/hours		
	Office hours		
Prerequisites	Reinforced Concrete Fundamentals 1 - Structural Analysis		
Language	English		
Compulsory/Elective	Compulsory		
Required textbooks and course materials	<p><i>“Reinforced Concrete, Design Theory and Examples” by T. J. MacGinley and B. S. Choo, Second edition, E & FN Spon press (1990).</i></p> <p><i>American Concrete Institute building code requirements for Structural Concrete 318-08 (2008)</i></p>		
Course website			
Course outline	This course deals with the concrete and steel bars used to reinforce it. This is an important field in civil engineering and applicable for many purposes. General principals, shear in concrete, torsion, axial loading, columns, slabs, walls, seismic design, introduction to precast/prestressed concrete		
Course objectives	The objective of this course is that the student acquires the basis of the Strength of Materials and Structural analysis. In this way, the student will be able to design different types of elements for construction procedure for reinforced buildings. For this purpose, many practical and applicable examples will be analyzed.		
Learning outcomes	<ul style="list-style-type: none"> • Understand the basic concepts of mixing, pouring, curing, and maintenance of concrete. • Perform design of beams, columns, slabs and walls subjected to gravity and lateral loads using ACI code, • Understand the analysis and design procedure of a regular building. 		
Teaching methods	Lecture		x
	Experiential exercise		x
	Assisted work		x
	Assisted lab work		x
	Others		
Evaluation	Methods	Date/deadlines	Percentage (%)
	Midterm Exam		30
	Class activity		5
	Quizzes		20
	Project (3 phases)		10
	Final Exam		35
	Total		100
Policy	<ul style="list-style-type: none"> • NO CELL PHONES are allowed during lecture and lab sessions. PLEASE turn them off before lecture! (Not silent or vibrating mode) • No late assignments will be accepted without prior arrangement with the instructor for acceptable excuses. Medical and family emergency will be considered on case-by-case basis. • No late homework will be accepted. Homework is to be completed on an individual basis. Students may discuss homework with classmates, but 		

	<p>students are responsible for your own work. If students have consulted classmates, please note the individuals name on the top of students' assignment.</p> <ul style="list-style-type: none">• Quizzes may be given unannounced throughout the term and will count as one homework. There will be no make-up quizzes.• No make-up exams. If students miss an exam, a zero score will be assigned to the missed exam.• If students should miss class due to personal emergency or medical reasons, please notify the instructor by email immediately. A doctor's note will be required for make-up work.• Students are responsible for completing the reading assigned from the textbook related to the covered topics and for checking email regularly for important information and announcements related to the course.• University policy on academic honesty concerning exams and individual work will be strictly enforced.• BE ON TIME!

Tentative Schedule			
Week	Date/Day (Tentative)	Topics	Textbook/Assignments
1		Introduction and General Principles	Chapter 1
2		International Codes	Chapter 1
3		Design Considerations	Chapter 2
4		Integrity of the structure	Chapter 3
5		New cementitious composites	Chapter 3
6		Loading systems	Chapter 4
7		Design for torsion	Chapter 4
8		Midterm Exam	-
9		Design of slabs systems (Shells)	Chapter 5
10		Design of slabs systems (Yield lines)	Chapter 5
11		Design of shear walls (Regular)	Chapter 6
12		Design of other walls (Seismic)	Chapter 6
13		Precast/prestressed concrete	Chapter 7
14		Seismic design for sway special	Chapter 8
15		RC design in software	Chapter 9
		Final Exam
