EXPERIENCE

Pasha Bank, Azerbaijan— RPA Developer

April 2025 - Present

- Design and implement automation solutions using **UiPath Studio**, leveraging best practices including **REFramework**.
- Collaborate with business analysts and departments to identify, analyze, and automate manual processes.
- Build reusable components and implement logging, error handling, and exception workflows.
- Monitor bots via **UiPath Orchestrator**, ensuring reliability, compliance, and performance.
- Conduct process documentation and participate in automation pipeline planning sessions.

Elfo SRL, Italy— Full Stack Software Engineer

June 2022 - September 2023

- Developed and maintained software applications using **C#** and **ASP.NET Core Framework**
- Implemented **RESTful Web Services** to enhance application functionality and improve user experience
- Designed and implemented complex database models using **nHibernate** and **SQL Server**
- Collaborated with frontend teams, building responsive user interfaces using **JavaScript** and **Vue.js**.
- Ensured smooth integration between frontend and backend services for seamless user experience.

Gain Theory, England — Software Engineer

September 2021 - June 2022.

- Implemented **RESTful Web Services** to enhance application functionality and improve user experience
- Provided technical support to users and resolved technical issues in a timely manner
