

Policy to Reduce the Impact of Alien Species

Developing a policy to decrease the impact of invasive species, also known as alien species, entails a combination of preventive, management, and restoration techniques. Through effective management and restoration activities, this strategy of Khazar University focuses on reducing the impact of alien species on campus.

1. The policy supports the development of methodologies for identifying invasive alien species (IAS) on campus.

2. The IAS list will be updated yearly, and a research committee will be established to study the impact of the IAS.

3. The procedure for effect mitigation actions would be recommended by the research committee.

4. Clubs and groups will be established to create awareness about recognizing and understanding the impact of IAS on campus.

5. All staff and students engaging in university events must follow the Policy.

To create a healthy environment for everybody, the collaboration of all university members is required.
