PROFILE INFO

I am a young professional with solid technical background in petroleum engineering area and improved soft skills. Throughout my career, I have taken part in various trainings and masterclasses that have provided me with new and diverse perspectives. Currently I am functioning as a Surveillance Petroleum Engineer at an international company and trying to grow everyday by learning & sharing new things.

EXPERIENCE

- **PETROLEUM ENGINEER, BP** 2022 - Present
Daily well monitoring, gas lift design, rate estimation, production allocation, well testing, PTA, surveillance & interference analysis, decline curve analysis, operational & intervention support
- **JUNIOR DRILLING ENGINEER, SOCAR AQS** 2022 - 2022
Live monitoring of drilling process, casing running, after drill bit evaluation, visual inspection of BHA, running FIT/LOT, daily drilling reporting, operational support
- **ENGLISH TEACHER/ASSISTANT** 2021 - 2022
Assisting and acting as replacement for English teacher, supporting the students needing more attention, preparation and running of mock exams

PAPERS

- **1st ISCSYR 2020**
Rheological models for HPHT conditions
- **SPE 2025 CTC**
Application of advanced surveillance techniques to achieve successful acid stimulation in ACG field
