	Noise Figure Measurements
	Phase Noise Measurements
	Digital Modulation Measurements
	Antennas and EMC
	Practical Measurement Demonstrations
Rules	Lesson organization
(Educational	General information on the subject will be provided for the students during lectures

# (Educational policy and behavior)

General information on the subject will be provided for the students during lectures.

Student's knowledge on the previous topics will be evaluated and new topic will be explained by mins of visual aids during seminars. Student's knowledge level will be tested oraly and in written forms before midterm and final exams. Submission of the individual works by the end of course is obligatory.

# Attendance

Participation of students at all classis is important. Students should inform dean's office about missing lessons for particular reasons (illness, family issues and etc.). Students, missing more than 25% of lessons, are not allowed to take the exam.

# **Tests**

Those students who have informed the teacher and the dean's office about missing the test in advance for particular reasons, are allowed to take the test next week.

#### Exams

All the issues related to the participation and admission to the exam are regulated by the faculty dean.

Topics of midterm and final exams are provided for the students before the exams. The questions of midterm exam are not repeated in the final exam.

# Violation of the rules of the exams

Disrupting the test and taking copy during midterm and final exams is forbidden. Test papers of the student who do not follow these rules are canceled and the students are expelled from the test by getting 0 (zero).

# The rule for completing the course

In accordance with the University rules the overall success rate to complete the course should be 60% or above. The students who failed the exam would be to take this subject next semester or next year.

# **Rules of conduct for Students**

Disruption of the lesson and not following ethical norms during the lesson, as well as conduction of the discussions by the students without permission and using mobile phones is forbidden.

Wee	Dates	Subject topics	Textbook/
k	(planned)		Assignments
1	02/10/21	Apply the Smith chart to evaluate microwave networks. Tramsmission	[1] p.709-741
		lines and wavequides.	
		Problem solving.	
2	09/10/21	Apply <i>N</i> -port representations for analysing microwave circuits; Radio Frequency Band, microwave and millimeter wave.	[1] p.750-773 [1] p-780-795
		Problem solving	
		Problem solving.	

3	16/10/21	Apply the Smith chart to evaluate microwave networks. Impedance Measurement- Measurement of unknown load impedance of a transmission line, Slotted Line Technique to measure unknown impedance.	[1] p.800-815
		Problem solving.	
4	23/10/21	Design and evaluate impedance matching networks. Distortion & Frequency Translation Measurement- Different types of distortion occurred at microwave frequencies, Procedures for frequency translation.	[1] p.815-838
		Problem solving.	
5	30/10/21	Design, evaluate and characterise directional couplers and power dividers. Different type of microwave detectors functions and applications, Sensors Definition & working principle, applications, measurement of scattering parameters.  Problem solving.	
6	06/11/21	Design and analyse attenuators, phase shifters and resonators; Other image problems Concept of vector network analyzer, Basic block diagram of vector network analyzer (VNA)  Problem solving.	[1] p.846-872
7	13/11/21	Explain basic properties of ferrite devices (circulators, isolators).  Application of vector network analyzers. Scalar Network Analyzer (SNA):	[1]p.881-900,
		Problem solving	
8	20/11/21	Radar systems and calibration, weather radar. Microwave remote sensing applications Definition of network analyzer, Difference between SNA&VNA, Basic block diagram Scalar Network Problem solving	[1] p.957-984
		Problem solving.	
9		Mid term exam	
10	27/11/21	Plane wave propagation, reflection, refraction, and attenuation. Antenna systems in microwave remote sensin Problem solving	[1] p.916-947
		Problem solving	
11	04/12/21	Passive microwave remote sensing and radiometry Microwave interaction with the atmosphere . Problem solving	[4]p. 73-96
		Problem solving	
12	11/12/21	Radiometer systems. Scattering and emission from natural targets.	[1] p.1061- 1085

13	18/12/21	Problem solving  Electromagnetic waves in one dimension. Wave equation. Sinusoidal	[2]= 555 611
13	16/12/21	waves. Boundary conditions. Reflection and transmission. Polarization.  Energy and momentum in EM waves. Problem solving	[3]p.555-611
		Problem solving.	
14	25/12/21	Basic block diagram of a spectrum analyzer, functions & applications of a spectrum analyzer.	[1] page 9-6
		. Problem solving	[1] page 10-6
15	28/12/21	Time Domain Electrometer (TDR) & IC Technology: Introduction to Electrometer, Measurement of reflection coefficient using electrometer technique, Basic block diagram of a time domain electrometer Problem solving	[1] page 11-6
