SYLLABUS

General	Title and code of subject,	t, ETR466 Electrical Power Supply 6 ECTS		
information	number of credits			
	Department	Physics and Electronics		
	Program	Bachelor		
	Academic semester	2022 fall	.,	
	Lecturer	Associate Professor, Ph.D Sevda N. Gar		
	E-mail:	sevdaqaribova@khazar.org, sqaribova@	<u>@rambler.ru</u>	
	Phone number:			
	Lecture room/Schedule	11 Mehseti Street, AZ1096 Baku, Azer	baijan (Neftchilar campus),	
		room		
		Lectures:		
Prerequisites	Consultations EENG 245	Saturday 12-00 -13-20		
Course	English			
language				
Type of the subject	Major			
Textbooks	Textbooks:

The fact that these comp secondary energy sources. Th supplies, such as converters, S bipolar power supply. Electric devices and therefore have a w vehicle, welding, aircraft, autor The course of Electrical Power source to the correct voltage, known how the electronic constudents understand how to purplies such as switched most study the work principle, advantant depower supply, regulated.	At each lesson 2 quizzes during the semester 3 supply as one of the branches of Power y conversion from a source to the voltage onents supplies power to the load make is course studies in detail the main class SMPS, linear power supply, regulated point and power supplies are the fundamental or wide range of applications, examples of whation, medical and other. 3 Supply includes the process of convert current, and frequency to the load. The moment supplies electric energy to the power supply are developed, will example supply, ac power supply, regulated pointages and application of programmable are developed power supply, uninterruptible power ocesses in power supple, will be able to a	10 10 10 30 40 100 Electronics widely reveals the e, current, and frequency to the es it possible to consider them estification and types of power ower supply, high voltage and component of many electronic which are the computer, electric estion of electric current from a erefore, the student should be eload. The end of course the main types of power ower supply. The students will and computer power supply, ac supply. The students will be	

Learning	What students should know by the end of the course:
outcomes	power supplies, types of power supplies, converters, switchmode power supply, uninterruptible power
	supply, programmable and computer power supply, flyback converter, controller, functions of
	converters and their applications as power supply, Faraday screen, AC converter, inrush control,
	bipolar power supply, power supply circuit.
Rules	Presentation work Prepare presentation work on the topics given by the teacher during the
(Educational	semester
policy and	Lesson organization
behavior)	General information on the subject will be provided for the students during lectures.
	Student's knowledge on the previous topics will be evaluated and new topic will be explained by mins
	of visual aids during seminars. Student's knowledge level will be tested oraly and in written forms
	(quizzes) before midterm and final exams. Submission of the individual works by the end of course is
	obligatory.
	• Exams (pass/fail)
	In accordance with the University rules the overall success rate to complete the course should be 60%
	or above. The students who failed the exam would be to take this subject next semester or next year.
	All the issues related to the participation and admission to the exam are regulated by the faculty
	dean. Topics of midterm and final exams are provided for the students before the exams. The questions
	of midterm exam are not repeated in the final exam. Students who got 57% can retake the exam.
	Violation of the rules of the exams
	Disrupting the test and taking copy during midterm and final exams is forbidden. Test papers of the
	student who do not follow these rules are canceled and the students are expelled from the test by
	getting 0 (zero).
	Rules of conduct for Students
	Disruption of the lesson and not following ethical norms during the lesson, as well as conduction of the
	discussions by the students without permission and using mobile phones is forbidden.
	• Attendance Participation of students at all classis is important. Students should inform dean's office about missing
	lessons for particular reasons (illness, family issues and etc.). Students, missing more than 25% of
	lessons, are not allowed to take the exam. Students who attend the whole classes will get 5 marks. For
	three absences student loses 1 mark.
	Quizzes
	There will be quizzes per two weeks. The quizzes will be announced in the classroom two weeks
	before and will relate to homework. Depending on the difficulty of the lesson, quizzes can be two or
	three times during the semester, each with three or five points.
	• Activity
	For activity during lessons in the whole semester, students are rewarded with 5 points. The activity of
	students is assessed by the preparation of home questions, which is given by the teacher after the
	lessons: it can also be oral discussions

lessons; it can also be oral discussions.

This program reflects the comprehensive information about the subject and information about any changes will be provided in advance.

Week	Dates	Subject topics	Textbook/
	(planned)		Assignments
1	15.09	Introduction to electrical power supply, various types of power supplies, main	[2] chapter 1
		classification, application, power diode, converters	https://www.watele
			ctrical.com/what-
	17.09	Oral questions and discussing	<u>is-a-power-supply-</u> and-types-of-
			power-supply-for-
			electrical-circuits/
2	22.09	Power switching devices characteristics: ideal switches, real swiches, practical	http://www.electr
		power switching devices. Power supply circuit. Uninterruptible Power Supply	ical4u.com/
	24.09	Discussing and testing	
3	29. 09	Functions and requirements common to most direct -off-line switchmode power	[1] chapter 1
		supplies. AC and DC power supply	p.1.3
	01.10	Oral qustions and discussing	
4	06.10	AC powerline surge protection . Regulated power supply, varistors	[1] chapter 2
	08.10	Testing and discussing	p.1.17
5	13.10	MOSFET, Gate turn-off thyristor	http://www.electr

			ical4u.com/
	15.10	Testing	
6	20.10	transistor	[1] chapter 4 p. 1.43
	22.10	Testing and discussing	
7	27.10	Converters: converters, primitive converter, DC converter, isolated and non-isolated converter	http://www.electr ical4u.com/
	29.10	Quizze 1	
8	03.11	Line rectification and capacitor input filters for direct –off-line switchmode power supplies. Linear power supply	[1] chapter 6 p.1.55
	05.11	Mid term exam	
9	10.11	Inrush control. Inrush current in power supply. New current-limiting technique	[1] chapter 7 p.1.73
