

## Career Prospects

Our graduates build successful careers in the field of GIS, Environment, and Remote Sensing, while also attaining a Geography teacher's diploma. A lot of our graduates secure admission to top-tier global universities for Master's studies in disciplines such as Geomatics, Remote Sensing, Environmental Data Science, GIS, and Environmental Planning. Currently, our alumni are thriving in roles within international and regional environmental organizations.

**Aynura Babaliyeva**  
Khazar University alumnus

“It is wonderful to learn the secrets of geography and environmental science at Khazar University. Studying here not only equips you with knowledge and skills, but also helps you start a rewarding career. The knowledge, skills and leadership qualities I acquired at Khazar helped me build a wonderful career.”

# Why study at Khazar University?

## 1 Top-ranked Azerbaijani University in the world international rankings

The top university in Azerbaijan, according to the 2022 QS Emerging Europe and Central Asia University Rankings.

Ranked 601-800 in Times Higher Education Impact Rankings 2023. Placed in 301-400 tier in SDG4 Quality Education.

Khazar University is the sole Azerbaijani higher education institution that has been ranked among the top 150 world's younger academic institutions by QS Top 50 Under 50 University ranking.

## 2 Highly qualified faculty

The Department of Geography and Environment at Khazar University serves as a research and educational nucleus, offering comprehensive education in geography and environmental sciences, facilitated by its esteemed teaching staff and extensive resources.

A highly qualified staff actively engaged in international research and educational programs ensures that students attain the most up-to-date knowledge and skills.

## 3 Research-based learning environment

During their studies, students actively engage in exploring a range of scientific and practical issues, working towards finding scientific solutions to environmental challenges specific to the Caucasus and the Caspian Sea region.

## 4 Travel-based field research

Students actively participate in field research, collect, and systematize samples to establish primary research databases.

## 5 The leading unity of teaching and science

Students become proficient in a diverse array of areas, encompassing both the teaching of Geography and contemporary issues.

## 6 Excellent solutions in Geographical Information systems

Our department provides different learning opportunities, which greatly impact students' future careers. Most of our graduates work as GIS and remote sensing specialists in various companies and organizations.

## 7 Continuing education

Many of our graduates pursue their master's studies in GIS and remote sensing, contemporary environmental issues, and sustainable development at the world's leading universities.

## Program Overview

BS in Geography Education is an undergraduate degree program combines in-depth study of geography with teaching skills needed to become highly effective teachers. All courses are thoughtfully designed to meet contemporary standards. Following graduation, our alumni frequently find employment as specialists in GIS and remote sensing across diverse organizations and companies. In recognition of the demand for highly skilled educators in the modern educational landscape, our department customizes its curricula to fulfill this requirement. Given this focus, the Department of Geography and Environment has established collaborations with leading universities around the world.

### Curriculum

**Length of Studies:**  
4 years (256 ECTS\*)

**University Requirements:**  
54 ECTS

**Major Requirements:**  
160 ECTS

**Core courses:**  
94 ECTS

- Earth Studies
- Environmental Science
- Human Geography
- Geomorphology
- Hydrology and Water resources
- Mapping and Geographical Information Systems
- Soil Science
- Physical and Environmental Geography of the world
- Economic geography of the World
- Remote Sensing

**Electives: 60 ECTS**

- Geographical Information Systems advanced
- Remote Sensing advanced
- Remote Sensing advanced 2
- Integrated Water Resources Management
- Caspian Studies
- Tourism Geography

**Internship: 6 ECTS**

\*European Credit Transfer and Accumulation System (ECTS)

**Semester dates**

**Fall semester:**

**September 15 – December 30**

**Spring semester:**

**February 10 – May 31**
