Program Overview

Newly established Veterinary Medicine bachelor's program offers comprehensive studies encompassing all aspects of animal life and health, allowing students to specialize in both farm and companion animals. Students will learn how to conduct clinical examinations, administer treatment, and implement preventive measures for various animals, including large and small horned animals, horses, birds, dogs, and cats. Investigating animal diseases, including their origins and modes of transmission, is crucial for enhancing the comprehension and prevention of human zoonotic diseases. The degree program aligns with those of reputable universities, encompassing both theoretical knowledge and practical experience. This approach also broadens the range of career opportunities for prospective graduates.
