<b>Policy</b>		<b>Assessment</b> <p>Teamwork: In this activity, a group of 3 to 5 students are selected and one topic is given them to prepare a poster. The teamwork in preparation and designing posters about specific topics is this stage's main purpose.</p> <p>Extensive Reading: Students must read intensively and extensively both updated authentic informational texts (on science, history, education, environment, etc.) and narratives that focus on building attitude, language, phonemic awareness, comprehension strategies, vocabulary development, writing skills, accuracy, creativity, and imagination.</p> <p>Speaking Videos: Students record a video narration of the read short stories or any other subject of their own choice relevant to their disciplines, on their mobile phones for five minutes. The recorded works can be displayed in the classroom and accordingly evaluated on their fluency, content, creativity, vocabulary, and structure.</p> <p>Writing Projects: Every student is allowed to conduct an independent investigation on a topic, preferably in the field of study that interests her/him the most. For the selection of the topics, students can consult their relevant teachers in their departments. The length of the project, depending on the level of her/his English, will be about 1500 words.</p> <p>This practice should start with 100 words and gradually arrive at the desired magnitude with the constant care and supervision of their English and subject teachers. Writing Projects assess students' progress as writers of information, opinion/argument, and narrative on-demand texts.</p> <p><b>Attendance (Lateness):</b> Attendance is important. Absences can be detrimental to one's grade due to the number of class activities (presentations and class participation) and the complexity of the subject. For every three unexcused absences, one (1) point will be deducted from the grade point average. More than 10 unexcused absences are excessive. Free participation is discouraged.</p> <p><b>Missed exams or assignments:</b> Advance notification should be given if the student is unable to attend a scheduled presentation or test. Full class participation and completion of assigned homework are necessary.</p> <p><b>Academic Dishonesty:</b> Any plagiarism while studying will be severely penalized, including the possibility of receiving a non-pass for the course. Reference should be given to the sources used in one's work. However, any research paper consisting of references and citations only, without further analysis by the student, will not be acceptable either. Cheating during the tests will be penalized including the possibility of a zero mark on the test.</p> <p>Topics of presentations/project papers will be pre-determined by the instructor. Free presentations/paper topics are not allowed. Presentation in cooperation with other students is allowed if pre-agreed with the instructor.</p>
