| Term project | 5   |
| Midterm exam | 30  |
| Final exam   | 40  |
| Total        | 100 |

## **Policy**

## Assessment

The course participants are expected to understand that the assessment system of this program is made up of both *formative* and *summative* components. This means that the overall score you will get at the end of this program would not be based upon your performance in exams perse (mid-term and final). The quality of your classroom participation, the way you will deal with your weekly assignments (including summaries, presentations, group work, etc.) will also make 25 percent of your overall score. Hence, it is expected that all participants pay due attention to each component of the assessment fairly and do their best in fulfilment of the expectations. If you feel that any of these requirements sounds vague and you are not sure of what you are expected to do, do not hesitate to ask for clarification from the course instructor as soon as possible.

Full-time students are expected to attend all elements of their courses unless they are sick or have permission of their School Dean. In general, to be eligible for taking exams students should not miss more than 30% of the class hours. In addition, the students are expected to be in the classroom ready to work at the appointed hour. It is the students' responsibility to be on time, ready and attentive. Continuing and unexcused absence or lack of participation may lead to withdrawal from the course. All forms of cheating and plagiarism are strictly banned. If 25% plagiarism is found in a submitted assignment, the student gets no point for it. If the student submits the assignment later than due time, 20% of the grade for that assignment is subtracted. The student whose behavior is disruptive either to the instructor or other students will be removed from the team.

| Tentative Schedule |  |   |
|--------------------|--|---|
| Week               | Topics   | Textbook/Assignments/Reading                                    |
| 1                  | Introduction to the course:  1. Structure of the research report 2. General issues on the concept of research design                         |   |
| 2                  | <ol> <li>Writing the introduction: Establishing the context</li> <li>Research design: Experimental and quasi-experimental designs</li> </ol> | <ul><li>Writing up research</li><li>Routledge HB (11)</li></ul> |
