

Identification	Subject (code, title, credits)	LING 613 Cognitive Linguistics-3KU/6ECTS
	Department	English Language and Literature
	Program(undergraduate, graduate)	Graduate
	Term	Spring, 2022
	Instructor	Dr. Davud Kuhi
	E-mail:	davoud.kuhi@khazar.org
	Phone:	989143144339
	Classroom/hours	
	Office hours	
Prerequisites		
Language	English	
Compulsory/Elective		
Required textbooks and course materials	<ul style="list-style-type: none"> - Geerraerts, D. & Cuyckens, H. (2007). <i>The Oxford handbook of cognitive linguistics</i>. Oxford: Oxford University Press. - Dabrowska, E. & Divjak, D. (2015). <i>Handbook of cognitive linguistics</i>. De Gruyter Mouton. - Wen, X & Taylor, J. R. (2021). <i>The Routledge handbook of cognitive linguistics</i>. London & New York: Routledge. 	
Course website		
Course outline	<p>The present course offers some fundamental issues on the very nature and scope of cognitive linguistics and sheds light on how this branch of linguistic inquiry feeds its insights into other linguistic orientations in order to answer fundamental questions on the nature of language, structure of language, meaning, the relationship between language and thought, the cognitive origins of meaning making and use of language.</p>	
Course objectives	<p>Since cognitive linguistics has been approached through multiple perspectives and there are relatively large numbers of ways cognitive linguistics could be characterized, the present program has focused on some basic issues whose understanding would result in identifying the key concepts, boundaries and also shared areas of research and interest. The logic has been to avoid presenting cognitive linguistics in abstract terms; instead, we have offered a framework within which every participant would find cognitive linguistics close to realities of language and human communication. It is expected that this way of characterizing the concept could motivate the participants to find their own areas of interest (and possibly research) within the course.</p>	

Learning outcomes	<p>By the end of this semester, the participants are expected to have developed:</p> <ul style="list-style-type: none"> - Understanding of basic issues and questions in cognitive linguistics - Defining the underlying assumptions of cognitive linguistics about language, structure, use, function, meaning - Developing a repertoire of theoretical constructs and metaphors cognitive linguistics has developed in order to understand the nature of language - Finding out the multiple ways cognitive linguistics can work with other areas of linguistics (e.g. applied linguistics, sociolinguistics, cultural linguistics) 		
Teaching methods	Lecture		X
	Group discussion		X
	Weekly summaries		X
Evaluation	Methods	Date/deadlines	Percentage (%)
	Active involvement in classroom tasks		5
	Presentations		5
	Term project		20
	Midterm exam		30
	Final exam		40
	Total		100
Assessment	<p>It should be understood that in a course like this the assessment system is not a one-shot summative paper and pencil test conventionally uses at the end of a semester. The assessment system here would comprise of a combination of subjective, dynamic, longitudinal assessment (achieved through presentations, summaries, questions and answers and feedbacks) and two macro-test (including the midterm and final exam). It should be remembered that even these macro-tests would no focus on local understanding of the type we expect in multiple-choice exams. What is expected is deep understanding and being able to express that understanding with fluent academic English in essay-type exams.</p>		

Policy	<p>Attendance (Lateness): Attendance is important. Absences can be detrimental to one's grade due to the number of class activities (presentations and class participation) and complexity of the subject. For every three unexcused absences one (1) point will be deducted from the grade point average. More than 10 unexcused absences are excessive. Free participation is discouraged.</p> <p>Missed exams or assignments: Advance notification should be given if the student is unable to attend a scheduled presentation or test. Full class participation and completion of assigned homework are necessary.</p> <p>Academic Dishonesty: Any plagiarism while studying will be severely penalized, including the possibility of receiving a non-pass for the course. Reference should be given to the sources used in one's work. However, any research paper consisting of references and citations only, without further analysis by the student, will not be acceptable either.</p> <p>Cheating during the tests will be penalized including the possibility of a zero mark on the test.</p> <p>Topics of presentations / project papers will be pre-determined by the instructor. Free presentations / paper topics are not allowed. Presentation in cooperation with other students is allowed if pre-agreed with the instructor.</p>
